

LOG HOME SIDING

SEAMLESS STEEL

*"The Siding Without
the QUACKS!"*

REVOLUTIONARY!

ABC Seamless Log Home Siding

A log home doesn't have to be made out of logs anymore. ABC Seamless has an alternative to the wood log look. It's maintenance-free seamless steel log home siding. This siding will transform your house into a rustic log home right before your eyes. Its look is so authentic you won't believe your new log home is made of steel. If you're thinking about log siding, consider the advantages of seamless steel log home siding.

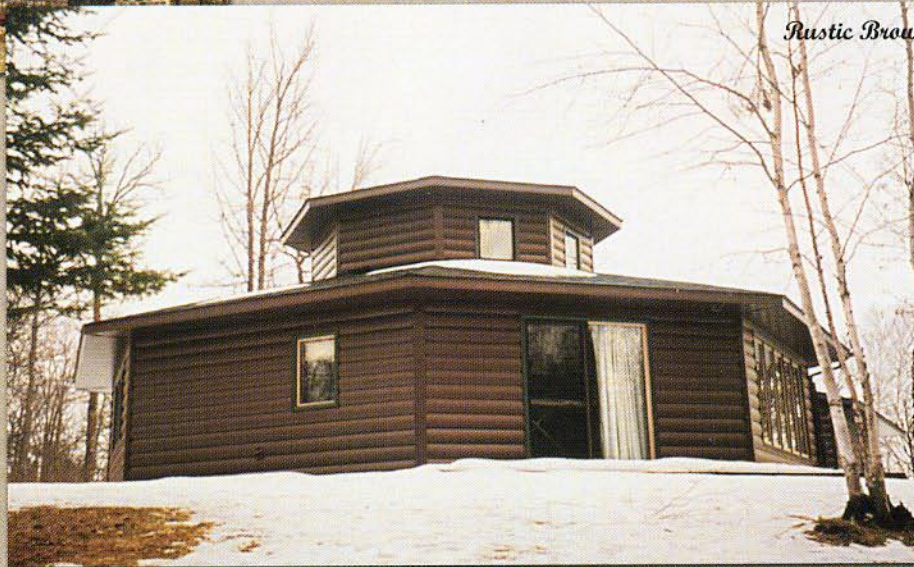

Advantages

Just like our traditional seamless steel siding, our steel log home siding is manufactured on site, seamless and comes in a variety of colors and sizes. This allows you the choice of color and style and gives your home a more realistic log look without the ugly seams. Not only does it give you the real log home look, it helps lower heating and cooling costs, will not rot, peel, flake or blister and comes with a lifetime-limited warranty never to crack, chip or rust.

Cedarwood

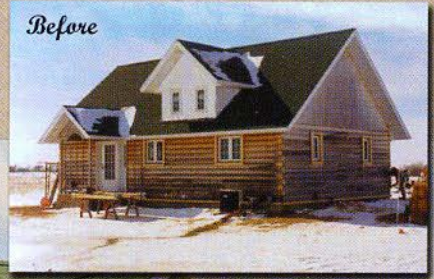

Rustic Brown

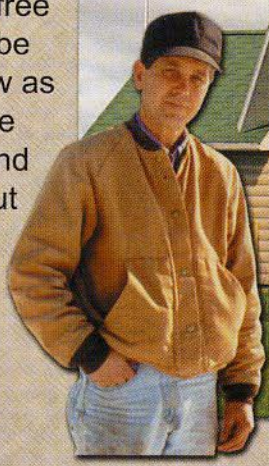

ABC Seamless Steel Log Home Siding offers you the log look without the maintenance hassle.

Better Than The Real Thing

Maintenance on a wood log home can be expensive and time consuming. Why spend your free time staining, caulking, fixing leaks and replacing rotten logs when you have to do it all over again in a couple of years. ABC Seamless Steel Log Home Siding can be installed directly over your existing log exterior, giving you a maintenance-free log home. Your home will be as beautiful years from now as the day it was installed. The big difference is the time and money you will save without sacrificing your home's natural appearance.

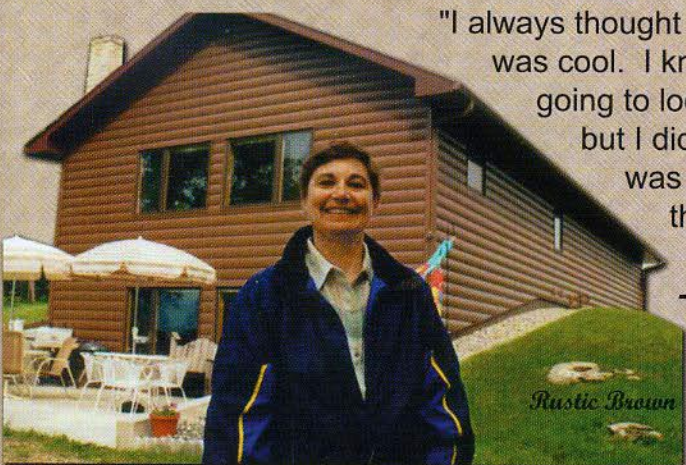

Weathered Cedar

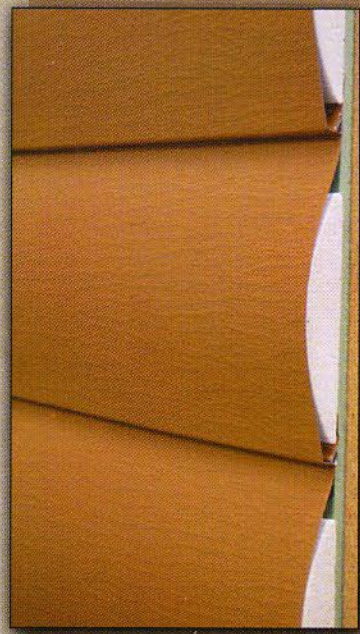

"I'm getting older and don't want to deal with all the maintenance which comes with owning a wood log home. Now there's no maintenance, and I still have my log home." -Oscar Green

"I always thought the log look was cool. I knew it was going to look good, but I didn't know it was going to look this good. It's great!"
-Karen Berger

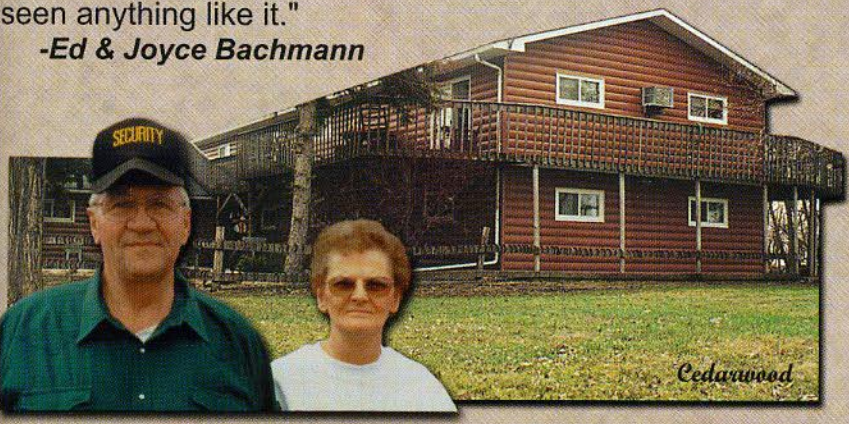

Installation

When each panel of ABC Seamless Steel Log Home Siding is applied, a warm blanket of insulation is placed between the old exterior and the new siding. A custom-made foam backer is then placed behind each individual log contour. This ensures your log home holds its shape and stays as beautiful as the day it was installed. ABC Seamless Steel Log Home Siding gives you the maintenance-free log home you have dreamed of for years.

"We've always wanted a log home and now we have one. We just love it...and haven't seen anything like it."
-Ed & Joyce Bachmann
